

## Maryland Environmental Disclosure Information

### Electricity Supplied from January 1, 2021 to June 30, 2021

Power plants can generate electricity from a number of different fuel sources, resulting in different emissions that impact the environment. American Power & Gas will report fuel sources and emissions to customers twice a year, allowing you to compare this electricity product with electricity products offered by other electricity suppliers.

American Power & Gas is a member of the PJM regional transmission organization that coordinates the movement of wholesale electricity. The standardized environmental data shown below are regional averages only and was gathered by the PJM Generation Attribute Tracking System.

American Power & Gas relied on some or all of the energy resources below to provide electricity.

Energy Source	Percentage Supply Mix
Biomass	0.00%
Methane	0.27%
Coal	23.29%
Energy Storage Resource	0.00%
Fuel Cell – Non-Renewable	0.03%
Gas	36.19%
Hydro – Conventional	1.44%
Nuclear	33.33%
Oil	0.15%
Other	0.01%
Solar – Photovoltaic	0.86%
Solid Waste	0.53%
Wind	3.74%
Wood	0.16%
<b>Total</b>	<b>100.00%</b>

### Air Emissions (lbs. per MWh)

Source	Carbon Dioxide	Nitrogen Oxides	Sulfur Dioxide
PJM System Average	848.41	0.39	0.49
