

## Environmental Disclosure Information – Quarterly Comparisons

American Power & Gas of Ohio, LLC

**Projected Data for the 2022 Calendar Year**

**Actual Data for the Period 01/01/22 to 6/30/22**

**Generation Resource Mix -**  
A comparison between the sources of generation projected to be used to generate this product and the actual resources used during this period.

**Environmental Characteristics–**  
A description of the characteristics associated with each possible generation resource.

|                             |                               |
|-----------------------------|-------------------------------|
| Biomass Power               | Air Emissions and Solid Waste |
| Coal Power                  | Air Emissions and Solid Waste |
| Hydro Power                 | Wildlife Impacts              |
| Natural Gas Power           | Air Emissions and Solid Waste |
| Nuclear Power               | Radioactive Waste             |
| Oil Power                   | Air Emissions and Solid Waste |
| Other Sources               | Unknown Impacts               |
| Solar Power                 | No Significant Impacts        |
| Unknown Purchased Resources | Unknown Impacts               |
| Wind Power                  | Wildlife Impacts              |

**Air Emissions –**  
Product-specific projected and actual air emissions for this period compared to the regional average air emissions.

**Radioactive Waste –**  
Radioactive waste associated with the product.

| Type:                        | Quantity: |                            |
|------------------------------|-----------|----------------------------|
| High-Level Radioactive Waste | Unknown   | Lbs./1,000 kWh             |
| Low-Level Radioactive Waste  | Unknown   | Ft <sup>3</sup> /1,000 kWh |

With in-depth analysis, the environmental characteristics of any form of electric generation will reveal benefits as well as costs.
